OBJECTIVE

Certified and results-oriented final-year Computer and Communication Engineering student with specialization in System Administration and Cybersecurity. Skilled in Linux server management, automation, and network security, with proven certifications in RHCSA and Ethical Hacking. Passionate about building and protecting robust IT infrastructure in challenging environments.

SKILLS AND INTERESTS

System Administration	Linux Server Management, Bash Scripting, Performance Tuning, Backup & Recovery Infrastructure Monitoring, Automation
Programming Languages	Python, Java, Java Script, Sql, YAML, Bash
Tools & Technologies	Nmap, Wireshark, Metasploit, Git, Docker, Ansible
Soft Skills	Problem Solving, Analytical Thinking, Team Collaboration

EDUCATION

Sri Sai Ram Institute of Technology, Chennai Bachelors of Engineering in Computer Engineering And Communication	Dec 2022 - May 2026 Percentage: 7.45
Bharathidasan Matric HSS Higher Secondary (Computer Science) (Class XII)	Jun 2021 - Mar 2022 Percentage: 64.83
Bharathidasan Matric HSS Secondary School (SSLC) (Class X)	Jun 2019 - Mar 2020 Percentage: 82.40

EXPERIENCE

System Administrator Intern Advantage Pro, Chennai • Administered Linux server infrastructure, optimizing system performance and achieving 99.9% uptime. • Diagnosed and resolved hardware/software issues, reducing downtime by 20%. • Designed automated backup and recovery solutions to ensure data integrity and continuity.	Mar 2024 - Apr 2024
Technology Intern AltrAI Technologies, Chennai • Contributed to development by writing optimized Python scripts for data processing tasks. • Analyzed and organized large datasets for testing workflows. • Assisted in algorithm testing, debugging, and documentation.	Jun 2024 - Jul 2024

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA)
- Ethical Hacking Certification – Larsen & Toubro

PROJECTS

Phishing Attack Simulation & Analysis

- Designed controlled phishing campaigns to evaluate user susceptibility.
- Provided recommendations that improved awareness by 25%.

Cybersecurity Awareness Training Module

- Developed a phishing website clone for training.
- Used in awareness sessions to promote secure practices.

Wi-Fi Security Assessment

- Researched WPA/WPA2 vulnerabilities and demonstrated ethical password cracking using Aircrack-ng.
- Documented findings to highlight the importance of strong security protocols.

POSITIONS OF RESPONSIBILITY

- Actively engaged in technical projects and internships focusing on system administration and cybersecurity.
- Currently developing a **desktop automation bot using Raspberry Pi and Python** for intelligent task management

Hobbies and Interests

- Cybersecurity Research
- System Automation
- Network Security
- Reading Tech Blogs
